

LIQUID LIMIT DEVICE - CASAGRANDE APPARATUS (T-030)

ASTM D4318 • BS 1377 • AASHTO T89

- Used to determine the moisture content at which soil pass from plastic to liquid state. This feature is very important in specifying the type of the soil, moreover, in determining the other parameters that relay on the soil type.
- Includes a cup that drops on a hard rubber base. It is also equipped with a drop counter.
- The grooving tool is supplied with the equipment (Testing standard is to be specified at the time of order).

Liquid Limit Device (T-030)

SUPPLIED WITH

- Blow Counter
- Grooving Tool (T-030/GT)

Code	Dimensions (± 1 cm)	Approximate Weight (kg)
T-030	22 x 15 x 13 (h)	2.5

TECHNICAL SPECIFICATIONS

- Comprising of:
 - Hard rubber base
 - Brass cup
 - Cam mechanism
 - Blow counter
